

ZKredible

Using Fully Homomorphic Encryption (FHE) and zkML technology to create a credit record evaluation system that is resistant to censorship and safeguards privacy.

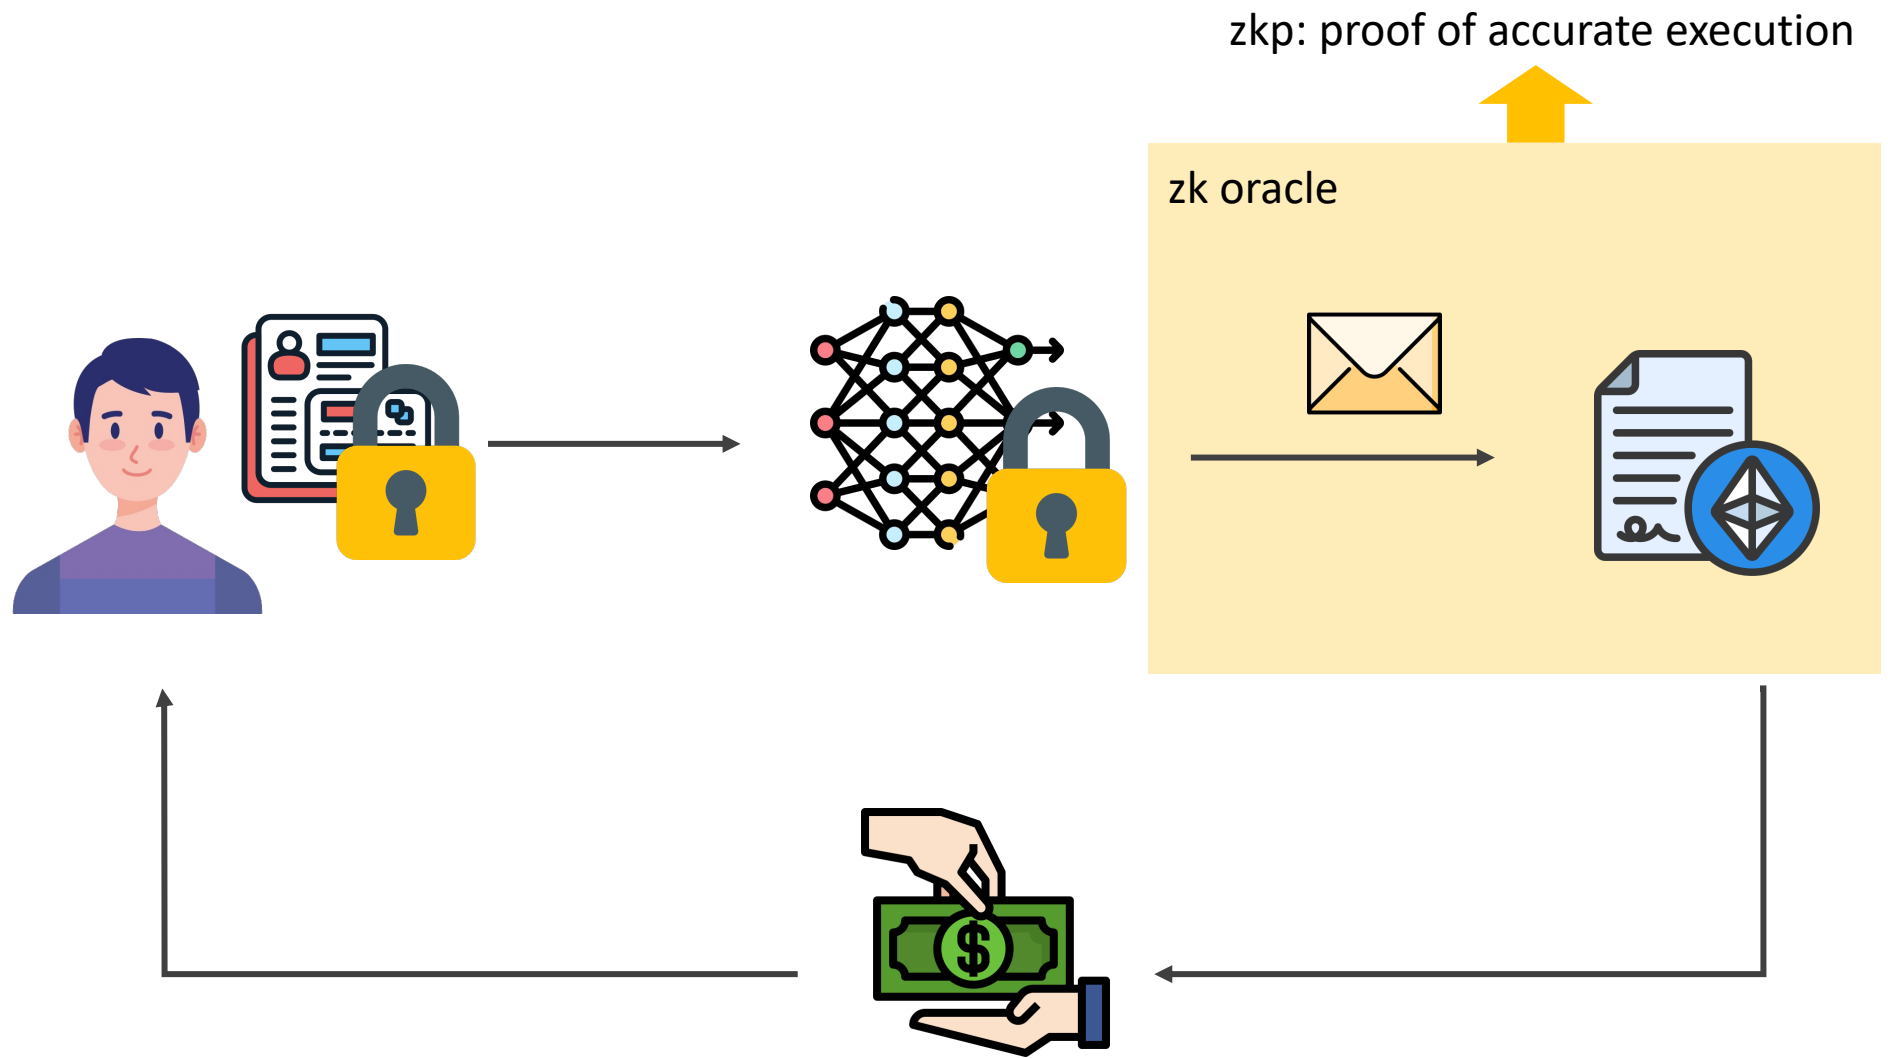

zkp: proof of inference

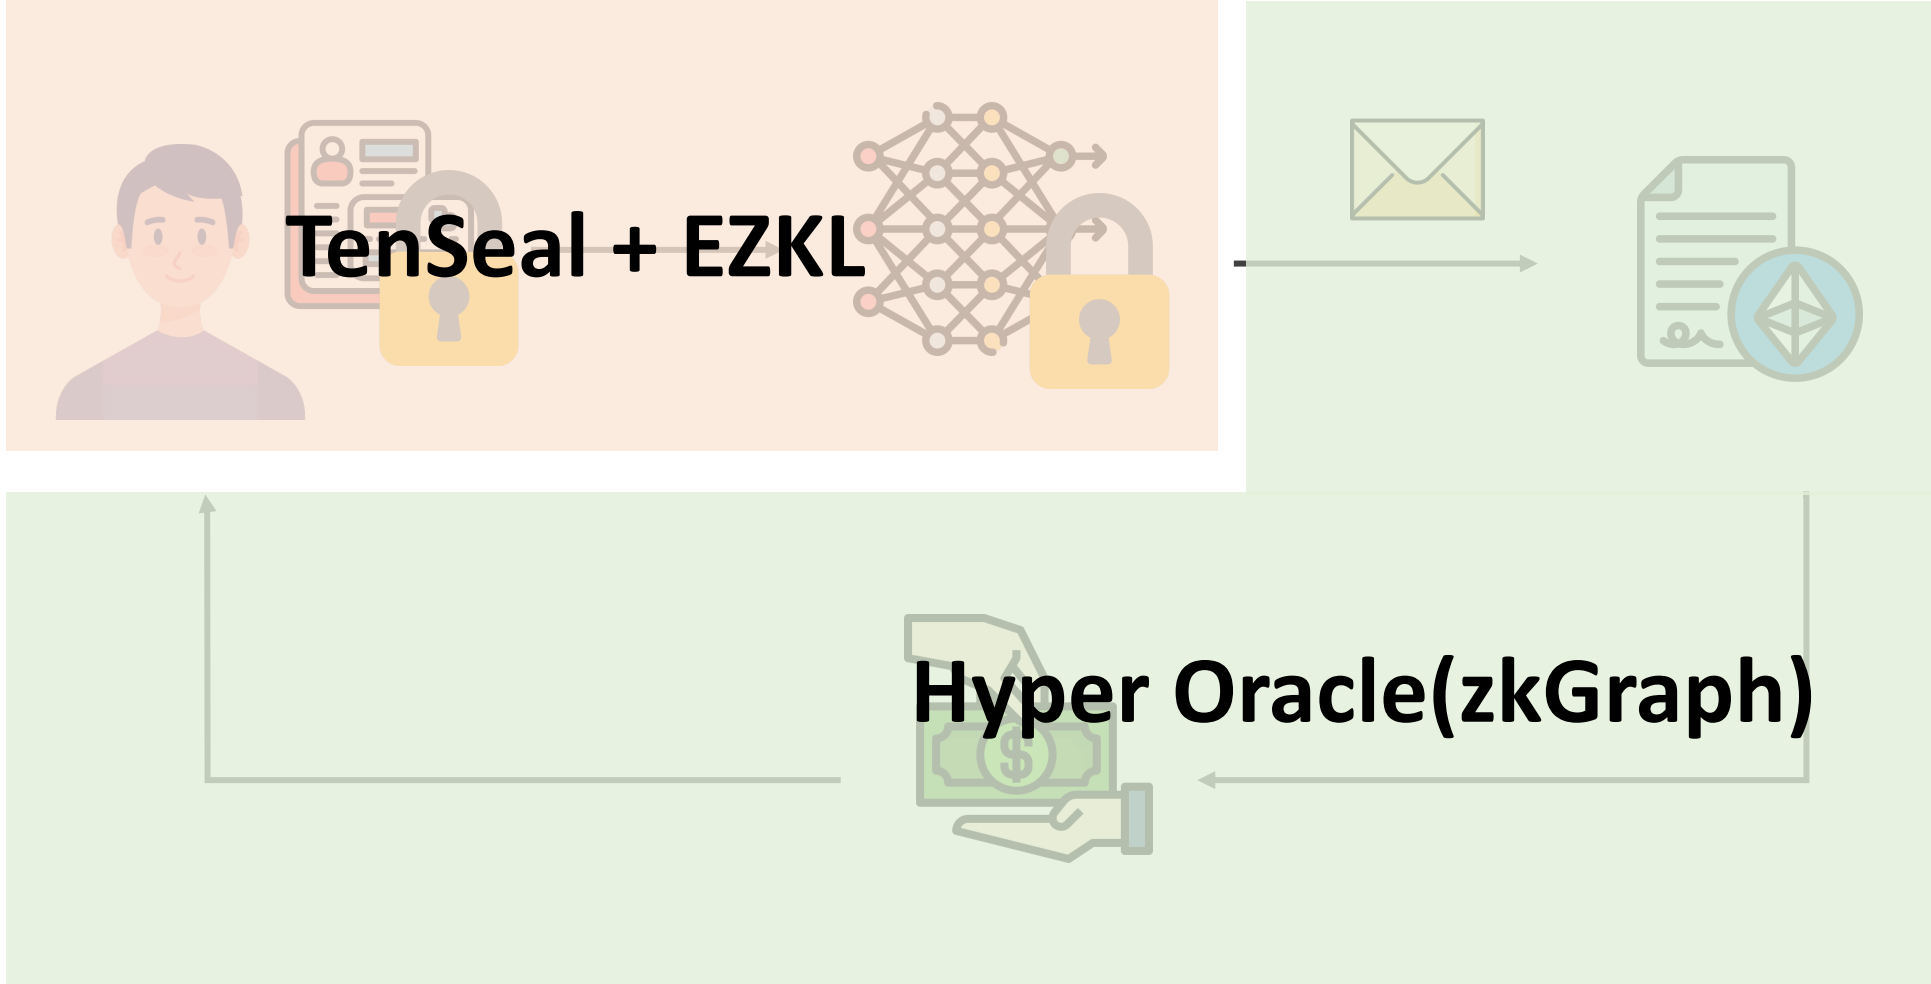

FHE(Fully Homomorphic Encryption) on machine learning

Encrypted data

Encrypted model

Current Limitation

Security of the overall system

Depth of the model

TenSeal + EZKL

Flexible model type support

more native and smoother interaction

Hyper Oracle(zkGraph)

Our Future Work

Attack and Anti-attack
